Los Angeles, CA, June 16, 2008 - Axia3 Heartburn Extinguisher® (www.Axia3.com), the fast acting, all natural treatment for heartburn, proudly announces its additional effectiveness against chronic bad breath. This Heartburn Extinguisher® with time-released digestive enzymes contains a month's supply of 30 tablets and retails for \$9.99 at Whole Foods locations in Southern California, and nationally through GNC and Vitamin World.

“Axia3 HEARTBURN EXTINGUISHER® already combats the onset of heartburn, acid indigestion and upset stomach. But this patented formula also provides minty fresh breath for people who experience severe halitosis,” said Ryan Doheny, Cofounder of Axia3 Heartburn Extinguisher®. “As a multipurpose remedy for these problems - one that is neither costly nor difficult to consume - Axia3 Heartburn Extinguisher® offers relief for individuals with a variety of digestion-related challenges. The brand reflects my own experiences in finding a palatable and successful means of treating these medical issues.”

The Halitosis Challenge: Breath Mints with Digestive Enzymes

Nearly 25 percent of Americans and 45 percent of the world's population have chronic bad breath. In the United States alone, consumers annually spend \$10 billion on mints, mouthwashes, rinses, gum, pills and toothpastes to address this phenomenon. "Axia3 Heartburn Extinguisher® avoids the gimmicks and false promises that leave people with a 'sour taste' and empty pockets. Our tablets are a holistic way to deal with halitosis and the complications of heartburn simultaneously," stated Doheny.

About Axia3 Heartburn Extinguisher®

Headquartered in Los Angeles, Axia3 Heartburn Extinguisher® is an all natural treatment for chronic heartburn. The brand is an economical and medically popular solution for people who suffer some form of indigestion or stomach upset.
