Los Angeles, CA, June 16, 2008 - Axia3 Heartburn Extinguisher® ([www.Axia3.com](http://www.Axia3.com)), the fast acting, all natural treatment for heartburn, proudly announces its inclusion of patented, time-released digestive enzymes to fight stomach upset. This Heartburn Extinguisher contains a month's supply of 30 tablets and retails for \$9.99 at Whole Foods locations in Southern California and nationally through GNC and Vitamin World.

"Axia3 Heartburn Extinguisher® is a highly effective and affordable remedy against heartburn and acid indigestion because of our innovative approach to good health. By including a patented brand of digestive enzymes, which is the result of extensive research and clinical testing, we successfully target the principal culprits responsible for chronic heartburn and sour stomach," said Ryan Doheny, Cofounder of Axia3 Heartburn Extinguisher®. "No other product has this formula, which reflects my own commitment to properly addressing the cause of this medical problem. As a longtime sufferer of heartburn, I personally endorse the way Axia3 Heartburn Extinguisher® provides sustained relief for this issue and other similar challenges."

### The All Natural Advantage

The overwhelming number of antacids, unlike Axia3 Heartburn Extinguisher®, contain controversial ingredients. In fact, according to leading universities some of these products can also create a more serious threat, such as osteoporosis, renal failure, gastric cancer and pneumonia when used in extended periods of time without a diagnosis. "People need to take charge

of their health and the remedies they consume. Axia3 Heartburn Extinguisher® is a major step in that direction," declared Doheny.

About Axia3 Heartburn Extinguisher®
